## **SJW Co-Kneader—Compounding Expert**

The SJW Co-Kneader is efficiently used for compounding certain temperature and shear sensitive additives into various plastics. In contrast to conventional compounding equipment, the operating principle of SJW Co-Kneader provides good distributive mixing action over an unusually short processing length.

### **Available Options for Ancillary Equipment**

- Single Screw Extruder Discharge (Cascade)
- Melt Pump Discharge
- Screw Shaft Cooling
- Volumetric Feeders
- Loss-in-weight Feeders
- Crammer and Top Feed Hoppers
- Twin Screw Side Feeders
- Liquid Injection Pump
- Strand Pelletizing System
- Air cooling and Die Cutting system
- Eccentric Die Face Pelletizing System

**XINDA owns various digital machines to process the spare parts. Every year XINDA invests a lot on processing machinery and the education of technical workers.**

### ■ **Parts Support**

Xinda has demonstrated the ability to give the parts support to the Co-Kneaders worldwide. We can provide the accurate and prompt service to your parts needs. XINDA stocks a complete inventory of replacement parts for all the Co-Kneaders.

### ■ **Testing running on Co-Kneaders**

XINDA welcome you to take a trial running on our Co-Kneaders at our place. Please send the raw materials at advance. In some case, we can help you to purchase them at local market. You will have a enjoyable testing trip here with our cordial co-workers.
